

# We're connected. Are you?

Cloud connectivity is fast becoming a “must-have” service for modern business. This gives you fast and stable connections to the big-players in this rapidly growing space, including Amazon Web Services and Microsoft Azure.

## Nexium's Cloud Connection service can offer you:

- Private and dedicated connectivity to the platform of your choice
- Improved application performance by establishing a more direct and secure path than via public Internet services
- Flexibility with workloads – move your environment to the Cloud service most suited to your business needs
- Integration with your network services – we manage our network directly so we will work with you to find the right mix of connectivity to suit your needs
- More efficient bandwidth usage – Cloud Connection services can reduce your Internet traffic, especially for data-heavy enterprise applications, potentially saving costs.

## Product overview

Nexium's Cloud Connection service allows you to connect to a number of major Cloud providers including Amazon Web Services and Microsoft Azure. While these services can be connected over the Internet, a dedicated connection service such as ours generally offers a higher level of performance, stability and security. This is essential to maximize your “Cloud” experience, whether you use hosted email, document, storage, backup or application systems.

So whether you are operating a hybrid environment or all of your services in the Cloud, we can provide the optimum mix of speed, reliability and scalability you need.

## Key benefits

In choosing a Nexium Cloud Connection service, you are benefiting from our significant investment in high-speed telecommunication networks across Queensland. Our networks are built to the highest industry standards. This makes it perfectly suited to delivering enterprise-grade network services which can give you:

- 99.95% service availability within and between regional and metro centres – delivering industry standards across Queensland
- Commercial grade SLAs – including four hour turnaround of fault resolution once on site
- On call support – via Nexium's Communications Network Operations Centres based in Rockhampton and Townsville. You will have access to on call support from a highly skilled team, proactively monitoring the network and responding immediately to any issues
- High-speed performance – delivering services 100's of times the speed of ADSL
- Service scalability – giving you the flexibility to change and adapt to business demands, with the minimum amount of impact and cost.

## What does that mean for you?

Quite simply, it means business “peace of mind”. As your solutions partner, Nexium understands the demands you face as a regional business, and is committed to helping you meet them head on.

## About Nexium

If you're looking to connect across Queensland, Nexium Telecommunications, as part of the Energy Queensland group of companies, offers you high capacity fibre optic connectivity where you need it, when you need it. Nexium utilises the reach of the Queensland transmission and distribution state-wide electricity network infrastructure to deliver exceptional telecommunications services and performance.
